*** Additional costs apply

Exhibition and conference of the 14th IFK will take place in the Auditorium Centre of the TU Dresden. Exhibition areas are located in the central foyer as well as in separate rooms. Unfortunately, for fire safety reasons, electricity cannot be used at stands in the foyer. However, the building's professional lighting technology will set the stage for your exhibits there as well. Please note the height restriction of 2.50 m in the separate exhibition rooms for your own stands.

DEADLINES FOR EXHIBITORS

Call for Exhibition 14th IFK

14th International Fluid Power Conference

Fluid Power Sustainable Productivity

March 19th - 21st 2024 in Dresden

INVITATION

The 14th International Fluid Power Conference (14th IFK) will be held in Dresden from March 19 to 21, 2024. The IFK is one of the world's most important specialist conferences in the field of fluid-mechatronic systems.

On the one hand the accompanying trade exhibition offers you the opportunity to find out about innovative products and system solutions and, on the other hand, provides an attractive platform for the presentation of new products and developments.

In addition, you will have the opportunity to establish contacts and exchange ideas with experts from the fluid power industry.

The exhibition will be opened during a „Get-Together Evening“ and is going to be the central meeting point of the conference. Throughout the conference, snacks and drinks will be served between the exhibition areas during breaks in the presentations.

For the presentation of your company at the 14th IFK we offer you a variety of interesting possibilities:

- a rentable stand construction system with numerous furnishing options
- your own exhibition stands or individual stand construction solutions of a high standard

Did we arouse your interest?

Then register your booth now and choose from the numerous equipment and furnishing options to present your company in the best way.

Further information and all forms for registration can also be found on our homepage at: www.ifk-dresden.de/.

If you have any questions, please do not hesitate to contact the exhibition management.

We look forward to welcoming you in Dresden in March 2024!

CONFERENCE FOCUS

Systems and Methodologies

- Energy Management
- System Design and Integration
- Digitization, Connectivity and Communication

Components and Fundamentals

- Fluids and Tribology
- Pumps and Motors
